**IB DIPLOMA  
PROGRAMME**

# THE DIPLOMA PROGRAMME

The IB Diploma Programme is a challenging two-year pre-university curriculum for students in the 11th and 12th grades. It leads to a qualification called the IB Diploma, which is recognized by the world's leading universities.

Students participating in the IB Diploma Programme comment on their sense of preparedness, self-confidence, research skills and their ability to manage their time. More importantly, they have a developed sense of the world around them and their responsibility to it.

Diploma Programme students study six subjects (three at the standard level and three at the higher level) over two years. They have three additional requirements, called The Core.

The Core consists of: the Theory of Knowledge (TOK), the Extended Essay (4000-word research paper) and the participation in CAS—Creativity, Activity and Service projects outside the classroom.

The DP is a cohesive, comprehensive and balanced programme, not a collection of individual courses. The most important distinguishing factor of the DP is the Core and the emphasis on global involvement.
