

Rising ACC 6th Summer Work

We hope you have a great summer. Since it would be in your best interest to review some mathematics this summer in preparation for this challenging and fun class, we're providing you with a few review problems for you to complete this summer. These are all problems that you will need to know how to do before the school year starts. These are concepts that were covered in your 5th grade math classes. *We will collect these problems on the first day of school.* They may be graded for accuracy. You will have a quiz over this material during the first week. If you need a refresher on any topics, we recommend visiting www.khanacademy.org.

If you have any questions, we have included websites at the end of the packet that can help you in completing it. Start your year off on the right track by completing these problems before school starts! Once again, the packet is due when you walk through the door the first day of class. We look forward to seeing you in August!

Please feel free to email Williams.monique@mail.fcboe.org with any questions.

Thanks,

Mrs. D. Monique Williams

DUE: First Day of School
